Clotium Suspension is an antifungal medication. It is a combination medicine used in the treatment of fungal skin infections. It kills the fungi that cause skin infections and thus treats the infection.

Clotium Suspension is only meant for external use and should be used as advised by your doctor. A thin layer of the medicine should be applied only to the affected areas of the skin with clean and dry hands. If it gets into your eyes, nose, mouth, or vagina rinse with water. It may take several days to weeks for your symptoms to improve, but you should keep using this medicine regularly. The course of the treatment should be completed to ensure better efficacy of the medicine. If your condition does not improve or gets worse, you should talk to your doctor.

The most common side effect of this medicine includes itching, dryness, redness, and burning sensation at the application site. These are usually self-limiting. Serious side effects are rare. You must consult the doctor if you experience any allergic reaction (rashes, itching, swelling, shortness of breath, etc.).

It is not likely that other medicines you take by mouth or injection will affect the way it works, but talk to your doctor before using it if you have used a similar medicine before and had an allergic reaction. Inform your doctor if you are pregnant, planning pregnancy or breastfeeding.

USES OF CLOTIUM LOTION

- [Treatment of Fungal skin infections](#)

BENEFITS OF CLOTIUM LOTION

In Treatment of Fungal skin infections

Clotium Suspension is a combination of two medicines. Clotrimazole helps in killing and stopping the growth of fungi, thereby clearing the infection and relieving the symptoms. Selenium is a mineral that rejuvenates the damaged skin and prevents formation of wrinkles. This enhances the healing process.

You should use this medicine for as long as it is prescribed, even if your symptoms disappear, otherwise they may come back. Depending on the type of infection you are treating, this may be several weeks. Even after your skin is completely cured, you may have to apply the cream occasionally to prevent the symptoms from returning.

SIDE EFFECTS OF CLOTIUM LOTION

Most side effects do not require any medical attention and disappear as your body adjusts to the medicine. Consult your doctor if they persist or if you're worried about them

Common side effects of Cantil TV

- Application site reactions (burning, irritation, itching and redness)

HOW TO USE CLOTIUM LOTION

This medicine is for external use only. Use this medicine in the dose and duration as advised by your doctor. Shake it well and apply to the area evenly.

HOW CLOTIUM LOTION WORKS

Clotium Suspension is a combination of two medicines: Clotrimazole and Selenium. Clotrimazole works by stopping the growth of fungi that cause infection, and reducing their numbers. This treats your infection. Selenium is a mineral that reduces damage caused to the skin due to infection, decreases flaking or scaling of the skin and helps in formation of new skin.
