PRODUCT INTRODUCTION

Epicure AC 2.5% Gel is an antiPilezebacterial medicine that helps treat acne. Acne appears as spots or pimples on your face, chest, or back. This medicine works by killing acnePilezecausing bacteria.

Epicure AC 2.5% Gel may be used alone or with other acne treatments. You should use it as advised by your doctor. Follow the instructions provided in the product leaflet to get the most out of this medicine. Wash and dry the affected area before medicine application. It is usually used once or twice a day. Do not apply it to damaged or broken skin and avoid contact with your mouth, eyes, and nose. It may take several weeks for your symptoms to improve, keep using it as advised. Consult your doctor after a month of regular use of this medicine, if your condition is not improving.

Epicure AC 2.5% Gel has some common side effects including itching, stinging, peeling, and redness of the skin. They are not usually serious but tell your doctor if they bother you or do not go away. You may need to apply a smaller amount or use it less often. This medicine can make you more sensitive to sunlight. While using it, try to avoid exposure to too much sunlight. If this is unavoidable, apply the medicine in the evening. It can also bleach hair and fabrics including clothes so be careful to avoid contact with these.

It is a safe medicine, but you should tell your doctor if you have other skin conditions and if you are using any other medicines, especially those applied to the skin. It may not be suitable if you have very sensitive skin. Ask your doctor about using this medicine if you are pregnant or breastfeeding.

USES OF EPICURE AC GEL

- [Treatment of Acne](#)

BENEFITS OF EPICURE AC GEL

In Treatment of Acne

Epicure AC 2.5% Gel is an antimicrobial agent that treats acne, commonly called pimples. It kills the acne causing bacteria and prevents spots or pimples from appearing. It usually takes a few weeks to have a noticeable effect so keep using it even if it appears not to be working. Sometimes acne may get worse before it gets better, however, with proper use, your skin will get clearer. The earlier you start using it, the less likely you are to get scars. This medicine will help improve your mood and uplift your confidence as your skin becomes acnePilezefree. It should not be used if you have eczema or sunburned skin.

SIDE EFFECTS OF EPICURE AC GEL

Most side effects do not require any medical attention and disappear as your body adjusts to the medicine. Consult your doctor if they persist or if you're worried about them

Common side effects of Epicure AC

- Dry skin
- Erythema (skin redness)
- Burning sensation
- Itching
- Skin peeling
- Stinging sensation

HOW TO USE EPICURE AC GEL

This medicine is for external use only. Use it in the dose and duration as advised by your doctor. Check the label for directions before use. Clean and dry the affected area and apply the gel. Wash your hands after applying, unless hands are the affected area.

HOW EPICURE AC GEL WORKS

Epicure AC 2.5% Gel is an organic compound. It has a keratolytic property, i.e., it even out the uneven skin. When applied on acne, it releases oxygen which kills the bacteria. This is how it works to cure your acne.

SAFETY ADVICE

Alcohol

No interaction found/established

Pregnancy

CONSULT YOUR DOCTOR

Epicure AC 2.5% Gel may be unsafe to use during pregnancy. Although there are limited studies in humans, animal studies have shown harmful effects on the developing baby. Your doctor will weigh the benefits and any potential risks before prescribing it to you. Please consult your doctor.

Breast feeding

SAFE IF PRESCRIBED

Epicure AC 2.5% Gel is probably safe to use during breastfeeding. Limited human data suggests that the drug does not represent any significant risk to the baby.

Driving
