PRODUCT INTRODUCTION

DEEP EZE Gel is used for the treatment of moderate to severe pain. It is applied topically to relieve muscle pain and joint pain in conditions like osteoporosis and rheumatoid arthritis.

DEEP EZE Gel is only meant for external use and should be used strictly as advised by your doctor. A thin layer of the medicine should be massaged into the affected areas with clean and dry hands. Avoid getting in contact with your eyes, nose, or mouth, and avoid applying it on wounded or damaged skin. In case of accidental contact, you should rinse it thoroughly with plenty of water.

It is usually safe with little or no side effects. However, it may cause a burning sensation and skin irritation at the site of application in some people. They are usually temporary and resolve with time. If they do not get better with time or worsen, you should let your doctor know. Your doctor may be able to suggest ways of preventing or reducing the symptoms.

Before using the medicine, it is important to tell your doctor if you are using or have recently used any other medicines for the same disease or other diseases. To make sure the medicine is safe, pregnant and breastfeeding women should consult their doctor before using the medicine.

USES OF DEEP EZE GEL

- [Pain relief](#)

BENEFITS OF DEEP EZE GEL

In Pain relief

DEEP EZE Gel is used to relieve pain, inflammation, and swelling in painful conditions that affect joints and muscles. It is very effective in treating strains, sprains, backache, and sports injuries. It is also helpful for pain caused by tendonitis (such as tennis elbow). Applying it will help you go about your daily life more easily. If the injury is severe or lasts a long time, you may also need to take painkillers or you can even consider physiotherapy. Consult a doctor if you are not sure.

SIDE EFFECTS OF DEEP EZE GEL

Most side effects do not require any medical attention and disappear as your body adjusts to the medicine. Consult your doctor if they persist or if you're worried about them

Common side effects of DEEP EZE

- Burning sensation
- Skin irritation

HOW TO USE DEEP EZE GEL

This medicine is for external use only. Use it in the dose and duration as advised by your doctor. Check the label for directions before use. Clean and dry the affected area and apply the gel. Wash your hands after applying, unless hands are the affected area.

HOW DEEP EZE GEL WORKS

DEEP EZE Gel is a nonsteroidal anti-inflammatory drug (NSAID). It works by blocking the release of certain chemical messengers that cause fever, pain and inflammation (redness and swelling).

SAFETY ADVICE

Alcohol

No interaction found/established

Pregnancy

CONSULT YOUR DOCTOR

DEEP EZE Gel may be unsafe to use during pregnancy. Although there are limited studies in humans, animal studies have shown harmful effects on the developing baby. Your doctor will weigh the benefits and any potential risks before prescribing it to you. Please consult your doctor.

Breast feeding

SAFE IF PRESCRIBED

DEEP EZE Gel is probably safe to use during breastfeeding. Limited human data suggests that the drug does not represent any significant risk to the baby.

The baby's skin should not come into direct contact with the treated area of skin.

Water-miscible cream/gel is preferred as ointments may expose the baby to harmful effects of DEEP EZE Gel via licking.

Driving

No interaction found/established

Kidney

No interaction found/established

Liver

No interaction found/established

WHAT IF YOU FORGET TO TAKE DEEP EZE GEL?

If you miss a dose of DEEP EZE Gel, apply it as soon as possible. However, if it is almost time for your next dose, skip the missed dose and go back to your regular schedule. Do not double the dose.
