

## Information about Evasmile Sunscreen Lotion

Evasmile Sunscreen Lotion contains Octinoxate, Avobenzone, Oxybenzone, and zinc oxide. Evasmile Lotion contains zinc oxide for complete UV-A & UV-B protection and it has superior UV-A protection compared to ordinary sunscreens.

Evasmile Lotion is a non-greasy sunscreen with water resistant formula. Evasmile Lotion is gel based so it is good for oily skinned people as well. It gets absorbed very quickly and does not make the skin look shiny.

Evasmile Lotion is specially suited for oily skin, humid conditions and excessive sweating conditions.
