PRODUCT INTRODUCTION

FUZENE Ointment is an antibiotic. It is used in the treatment of bacterial skin infections. It relieves the symptoms of the infection by stopping the further growth of the causative microorganisms.

FUZENE Ointment should be used in the dose and duration as prescribed by your doctor. This medicine is for external use only and should be used regularly to get the most benefit from it. Don't use more than you need as it won't clear your condition faster and some side effects may be increased. The affected area should be clean and dry before application of the ointment. You must wash your hands thoroughly before and after applying this medicine.

It may cause burning sensation, skin irritation, itching and redness immediately following application over the affected area, as side effects of this medicine. However, these are temporary and usually subside on their own. Inform your doctor if they do not resolve or persist for a longer duration.

Avoid direct contact of cream or ointment with your eyes. In case of direct contact, wash your eyes with water immediately and seek immediate medical attention. Tell your doctor if you are pregnant, planning to become pregnant or are breastfeeding.

USES OF FUZENE OINTMENT

- [Bacterial skin infections](#)

BENEFITS OF FUZENE OINTMENT

In Bacterial skin infections

FUZENE Ointment works by stopping the growth of infection causing bacteria on your skin and also prevents their multiplication. This helps stop the spread of infection and promote healing. FUZENE Ointment also reduces symptoms of skin infections like redness, swelling and itchiness. Altogether, it improves skin condition and makes you feel good. This treatment has few common side effects and should clear up infections within a few days, but you should keep using it for as long as it is prescribed. It is advisable to keep the area of infection clean and avoid touching or scratching.

SIDE EFFECTS OF FUZENE OINTMENT

Most side effects do not require any medical attention and disappear as your body adjusts to the medicine. Consult your doctor if they persist or if you're worried about them

Common side effects of FUZENE

- Application site reactions (burning, irritation, itching and redness)

HOW TO USE FUZENE OINTMENT

This medicine is for external use only. Use it in the dose and duration as advised by your doctor. Check the label for directions before use. Clean and dry the affected area and gently massage the ointment.

HOW FUZENE OINTMENT WORKS

FUZENE Ointment is an antibiotic. It works against bacteria that cause skin infections by preventing the synthesis of essential proteins necessary for survival of bacteria. Thus, it prevents the skin infection from spreading.

SAFETY ADVICE

Alcohol
