PRODUCT INTRODUCTION

HEPVIAR Ointment is an antiviral medicine which helps in treating skin infections caused by Herpes simplex virus such as herpes labialis. It prevents the multiplication of the virus in skin cells and therefore helps in clearing the skin infection.

HEPVIAR Ointment is for external use only. You should use it in the dose and duration as advised by your doctor. The affected area should be clean and dry before application of the ointment. You must wash your hands thoroughly before and after applying this medicine. Do not touch the sores unnecessarily with your hands or towel, to avoid spreading the infection.

Some common side effects include burning, irritation, itching and redness of the skin, at the site of application. Please consult your doctor if these side effects persist for a longer duration. Do not use it in the eyes, mouth, nose or vagina as it may cause irritation. If accidental exposure occurs, rinse immediately with plenty of water.

USES OF HEPVIAR OINTMENT

- [Herpes labialis](#)

BENEFITS OF HEPVIAR OINTMENT

In Herpes labialis

Herpes labialis, commonly known as cold sores, is a viral infection that primarily affects the lip. Symptoms typically include a burning pain followed by small blisters or sores. HEPVIAR Ointment can speed up healing of herpes labialis and also prevent recurrence of the sores. Keep using this medicine as prescribed by the doctor to get maximum benefit.

SIDE EFFECTS OF HEPVIAR OINTMENT

Most side effects do not require any medical attention and disappear as your body adjusts to the medicine. Consult your doctor if they persist or if you're worried about them

Common side effects of HEPVIAR

- Application site reactions (burning, irritation, itching and redness)
-

HOW TO USE HEPVIAR OINTMENT

This medicine is for external use only. Use it in the dose and duration as advised by your doctor. Check the label for directions before use. Clean and dry the affected area and gently massage the ointment.

HOW HEPVIAR OINTMENT WORKS

HEPVIAR Ointment is an antiviral medication which treats skin infections caused by Herpes simplex virus. It works by preventing the multiplication of virus in the skin cells. This stops the virus from producing new viruses and clears up your skin infection.

SAFETY ADVICE

Alcohol

No interaction found/established

Pregnancy

SAFE IF PRESCRIBED

HEPVIAR Ointment is generally considered safe to use during pregnancy. Animal studies have shown low or no adverse effects to the developing baby; however, there are limited human studies.

Breast feeding

SAFE IF PRESCRIBED

HEPVIAR Ointment is probably safe to use during breastfeeding. Limited human data suggests that the drug does not represent any significant risk to the baby.

Driving
